Gamification	Comments
Hangman	This game takes words from either a Glossary or quiz short answer questions and generates a hangman puzzle. Admin can set the number of words that each game contains, it shows the first or last letter, or it shows the question or the answer at the end.
Crossword	This game takes words from either a Glossary or quiz short answer questions and generates a random crossword puzzle. Admin can set the maximum number of columns/rows or words that contains. Student can press the button "Check crossword" to check if the answers are correct. Every crossword is dynamic so it is different to every student.
Cryptex	This game is like a crossword but the answers are hidden inside a random cryptex.
Millionaire	This game takes words from multiple choice quiz questions and creates a "Who wants to be a Millionaire" style game complete with the three lifelines.
Sudoku	This game shows a sudoku puzzle to the students with not enough numbers to allow it to be solved. For each question the student correctly answers an additional number is slotted into the puzzle to make it easier to solve.
Snakes and Ladders	The students have to traverse a traditional "Snakes and Ladders" board by answering questions taken from either a Glossary or quiz short answer questions. As they get an answer right, the dice is rolled and a random number displayed. The game piece is moved ahead that many squares. If the game piece is in the bottom of a ladder and the answer is correct, it goes to the top. If the game piece is in head of snake and the answer is wrong, it goes to the tail.
The hidden picture	This game randomly grabs an image from a glossary and hides it behind panels. As each question is answered correctly a portion of the image is revealed. How fast can they guess the image? The picture can be taken from another glossary, in case of glossaries with no pictures.
Book with questions	When the student answers correct can go to the next chapter.
Superbrain Game	Available

Adventure Game	Available
Point System	When grading an activity it is possible to use a grading scale, a grade point (numerical scale) or neither.
Redeem Points	The users can redeem points gathered for shopping vouchers and other gratification methods
Leaderboard on Course Level	The admin can view progress of all the users on course level
Leaderboard on LMS Level	The admin can view progress of all the users on the LMS level
Social Media and Badges Integration	Social media can be integrated with the badges so that the users can share their achivement on social media at a click of a button
Badges	Badges created in LMS get displayed on a user's profile or pushed to their open badges backpack. Public badge collections in their backpack will display in their LMS profile.
