Paradiso LMS

Paradiso Complete eLearning Solution

LMS + Performance Management + **Portal**

Benefits of Paradiso LMS for Corporations

-  **Easy-to-use interface**
The main navigation interface was redesigned to clearly differentiate it from other LMS navigation interfaces. The new design allows the user to concentrate more on the content and makes the LMS more navigable, giving more focus on the actual content of your courses.
-  **Save costs with all-in-one platform**
We have an all-in-one platform built in our LMS which includes multiple solutions for the corporate user, such as a corporate portal, performance management applications, and many more. This complete platform is the best option for big savings: You get three corporate-oriented platforms in one LMS product.
-  **Save implementation time and cost with hundreds of pre-built integrations**
Our platform is fully integrated with a wide selection of technologies for corporate solutions such as HRIS, CRM, video conferencing systems, e-commerce platforms, multi-tenant features, and much more. These integrations make implementation more time- and cost-efficient.
-  **Higher user engagement and richer learning**
Due to features such as gamification, social learning and mobile compatibility, learners find our platform more engaging, appealing and easy to use. This way you know to the right track for the right type of training
-  **Lower operating costs**
A single LMS for everyone: Our multi-tenant feature allows you to use a single LMS for different departments or groups of users such as customers, partners, and employees which results in centralized reporting and lower implementation and operation.
-  **Personalization and branding**
You dream it, we can built it. The entire user interface is modular which allows you to drag and drop various blocks to personalize your own UI and look. You can change the layout and colors in order to match your brand and requirements. Increase productivity with flexible, mobile-ready themes.

Features

Highly Customizable

From login page to inner pages, everything can be easily customized.

Easy-to-Use Interface

The main navigation was redesigned to clearly differentiate it from other LMS navigations. The new design allows users to concentrate more on the content and makes the platform more navigable.

Integrated Portal

Paradiso LMS provides an engaging portal which can be used for employees, partners or customers. It also includes a course library with access to thousands, with a range of topics from management, leadership, to computer skills.

Social Learning

Paradiso LMS provides a range of tools such as a Facebook-like news feed, social networking, chat, wiki and user forums to support informal and social learning. These features allow employees to collaboratively build a body of knowledge that later generations of employees will benefit from.

Gamification

If you have a hard time getting employees to attend corporate training, maybe you need to add a little fun. Paradiso LMS helps you motivate your employees using gamification strategies such as the use of Badges.

Multi-tenant

With just a single LMS, you can support many departments or partners with their custom branding and control. That's the beauty of the Paradiso LMS Multi-tenant feature!

Integrated Performance Management

Do appraisals, 360 reviews, Individual Development Plans (IDP), competency-based learning and many more performance management tasks with our LMS.

Walkthrough and Integrated Helpdesk

Trying to find out how to use a particular feature or perform a certain task? Paradiso LMS comes with a built-in walkthrough tool to guide you step-by-step in all your Paradiso tasks. In addition, our fully integrated HELPDESK CHAT within the LMS will provide you with a Paradiso e-learning expert one click away.

Integrations

Our eLearning platform has been integrated with many applications. Here are some of the main ones:

HRIS

HRIS

Paradiso LMS integrates with HRIS systems such as Peoplesoft, SAP, and Oracle to keep user profiles and course completion synced with course data. When a new employee joins the company, a new account is automatically created and the employee is given access to all the onboarding training.

eCommerce

Paradiso LMS integrates with eCommerce platforms such as Magento, Paypal, Authorize.net, WooCommerce, etc. You can increase revenue by selling online training. Our eCommerce integration also helps market your training programs online. The eCommerce integration also supports single sign-on and auto-enrollment apart from many other features.

CRM

CRM

Paradiso LMS integrates with Salesforce, Microsoft Dynamics along with other CRM Systems. This integration makes it easy to implement sales, customer and partner training programs.

Productivity tools

Paradiso LMS integrates productivity and collaboration tools such as Google apps and Evernote. These integrations help your staff get organized with their daily tasks without having to download any external app!

Content Management System

Paradiso LMS integrates with content management systems such as Joomla, Wordpress and Drupal. The CMS allows organizations to manage their portals or websites. By having CMS and LMS integrations, the users can easily get access to the LMS. It also helps in keeping data in sync.

Video Conferencing

Paradiso LMS integrates with video conferencing platforms such as WebEx, Adobe Connect, GoToMeeting, Big Blue Button, Google Hangout, etc. You can have remote classes or webinars or online company events using Paradiso LMS. Our integration allows single sign-on (SSO) to video conferencing applications. In addition, recordings of video conferences can be stored into the LMS after the event is completed.

Authentication

Paradiso LMS allows your employees to use LDAP, LinkedIn, Google+, Facebook, Twitter and many other platforms for authentication. By having the login to the LMS very easy for your employees, you can increase faster adoption and use of the platform.

Content Repositories

Enterprise content repositories such as Alfresco, Box.net, etc. help organizations in managing the vast amount of content. With our integrations, content authors can manage the content creation process in content management applications and publish content directly into the LMS.

Integrated
