Paradiso Complete eLearning Solution

LMS + ePortfolio + Portal

Benefits of Paradiso LMS for Education

Easy-to-use interface

The main navigation interface was redesigned to clearly differentiate it from other LMS navigation interfaces. The new design allows the user to concentrate more on the content and makes the LMS more navigable, giving more focus on the actual content of your courses.

Save costs with all-in-one platform

We have an all-in-one platform built in our LMS which includes multiple solutions for the education sector, such as a student, parent, teacher and admin portal, ePORTFOLIO, and many more. This complete platform is the best option for big savings: You get three education-oriented platforms in one LMS product.

Save implementation time and cost with hundreds of pre-built integrations

Our platform is fully integrated with a wide selection of technologies for the education sector such as Khan Academy, programming lab, video conferencing systems, multi-tenant features, and much more. These integrations make implementation more time- and cost-efficient.

Higher user engagement and richer learning

Due to features such as gamification, social learning and mobile compatibility, students find our platform more engaging, appealing and easy to use. This way you know you are delivering the right type of eLearning experience.

Lower operating costs

A single LMS for everyone: Our multi-tenant feature allows you to use a single LMS for different grade levels, departments, groups of students or teachers, or special courses, such as teacher training or summer school courses. This feature allows centralized grading and reports, which results in lower implementation and operation costs.

Personalization and branding

You dream it, we can built it. The entire user interface is modular which allows you to drag and drop various blocks to personalize your own UI and look. You can change the layout and colors in order to match your institution brand and requirements. Increase productivity with flexible, mobile-ready themes.

Features

High Customizable

From login page to inner pages, everything can be easily customized.

Easy-to-Use Interface:

The main navigation was redesigned to clearly differentiate it from other LMS navigations. The new design allows users to concentrate more on the content and makes the platform more navigable.

Integrated Portal

Paradiso LMS provides an engaging portal which can be used for students, parents, admin staff and teachers. It also includes a library with access to thousands of courses, with a range of topics from management and leadership, to computer skills.

Social Learning

Paradiso LMS provides a range of tools such as a Facebook-like news feed, social networking, chat, wiki and user forums to support informal and social learning. These features allow students to collaboratively build a body of knowledge that later generations of students will benefit from.

Gamification

If you have a hard time getting students to engage in certain classes, maybe you need to add a little fun. Paradiso LMS helps you motivate your students using gamification strategies such as the use of Badges.

Multi-tenant

With just a single LMS, you can support many departments or partners with custom branding and control. That's the beauty of the Paradiso LMS Multi-tenant feature!

Walkthrough and integrated helpdesk

Trying to find out how to use a particular feature or perform a certain task?

Paradiso LMS comes with a built-in walkthrough tool to guide you step-by-step in all your Paradiso tasks. In addition, our fully integrated HELPDESK CHAT within the LMS will provide you with a Paradiso e-learning expert one click away.

Flipping the classroom Pedagogy

Nowadays learning is about experience, the way your student experience the content, that is the way they are going to remember and learn the content provided to them. Our LMS offers the possibility to extend this already great experience based, by offering FULL support so your students interact with part of the learning on an engaging, dynamic and stable platform.

Integrations

Our eLearning platform has been integrated with many applications. Here are some of the main ones:

SIS

SIS

The convenience of having all your students' information in one place and fully integrated with our Paradiso LMS is the perfect combination for all your reporting, data collection and grading tasks.

eCommerce

Paradiso LMS integrates with eCommerce platforms such as Magento, Paypal, Authorize.net, WooCommerce, etc. You can increase revenue by selling online training. Our eCommerce integration also helps market your training programs online. The eCommerce integration also supports single sign-on and auto-enrollment apart from many other features.

ePortfolio

Offer your students the capability of storing their educational experiences, gathering their documents, and having their resumé ready to be sent with all their files in one place. Paradiso LMS provides a fully integrated ePortfolio to enrich your eLearning experience.

K.A

Khan Academy

Bring one the best online content providers to your students and use it as a resource for each one of your courses. Khan Academy has over 10,000 resources in all subject areas, each one bundled with your Paradiso LMS.

Content Management system

Paradiso LMS integrates with content management systems such as Joomla, Wordpress and Drupal. The CMS allows organizations to manage their portals or websites. By having CMS and LMS integrations, the users can easily get access to the LMS. It also helps in keeping data in sync.

Video Conferencing

Paradiso LMS integrates with video conferencing platforms such as WebEx, Adobe Connect, GoToMeeting, Big Blue Button, Google Hangout, etc. You can have remote classes or webinars or online educational events using Paradiso LMS. Our integration allows single sign-on (SSO) to video conferencing applications. In addition, recordings of video conferences can be stored into the LMS after the event is completed.

Authentication

Paradiso LMS allows your students to use LDAP, LinkedIn, Google+, Facebook, Twitter and many other platforms for authentication. By having the login to the LMS very easy for your students, you can increase faster adoption and use of the platform.
